## **LOGISCOOL WAS ACCREDITED WITH AN EXCELLENT RATING BY EAF, AN INTERNATIONAL CERTIFICATION ORGANIZATION**

In January 2022, Logiscool's curriculum and education platform received an 'excellent' rating from one of the most prestigious education certification organizations, Education Alliance Finland (EAF). This organization works with Finnish pedagogy experts and education researchers to grade education enterprises in other countries according to strict criteria.

*"The 'excellent' rating, given to only a few, proves that we are successfully applying the methods that have made Finnish education world-famous"* - said Dr.Anita Breuer, co-founder of Logiscool.

The certificate proves that Logiscool trains competent, self-confident and imaginative creators for the world of information technology. Children, who will become capable of problem-solving and the successful analysis of new points of view.

The curriculum helps children better understand subjects taught at school and gives them knowledge that they can use in the world of employment. The teaching process supports the development of a positive self-image and encourages students to learn from mistakes and to find multiple ways of fixing them. Logiscool's education provides students with fun-based long-term motivation and will help them face new challenges in all areas of life with an open attitude.

*"We're extraordinarily proud, since this is positive feedback, further proving that our services are truly world-class"* - Dr.Anita Breuer concluded.

Logiscool gives you a chance to try our methods for free at our open days. For more information, visit [www.logiscool.com](http://www.logiscool.com) .
